this short book is designed to cover all the key essential elements of making an investment proposal to raise finance from private and public investors both the proposal document itself and the presentation of it although made with the owners and directors of small and medium enterprises in mind it is equally valid for people wanting to make project proposals or launch new ventures and initiatives a subject like this by its nature is technical we have done our best to keep jargon and terminology to an acceptable minimum in part because we want to take you into the mind of the potential investor so you understand what drives investor decisions in part because investment proposals are less about ratios and more about assessment and judgment qualitative aspects of appraisal not quantitative ones if you are a professional financial analyst or investment manager nothing in this book should be of surprise to you you might even criticize for its intellectual lightness if you are an entrepreneur or general manager who needs to find investment and needs to be briefed simply and quickly on the process and activities that form part of making an investment proposal without getting overly detailed in financial jargon at this stage then this is the book for you

join the digital audio revolution tens of millions of users are embracing digital music and with digital audio essentials you can too nearly every personal computer built in the last few years contains a cd burning drive mp3 and other portable sales dominate the consumer electronics industry and new networkable stereo equipment lets you use your digital music collection to power your home entertainment system whether it is downloading music ripping cds organizing finding and creating higher quality music files buying music players and accessories or constructing a home stereo system digital audio
